SWME 2018 Theme

'Networks and Recording – getting an overall picture for the South-West'

Recording networks, record keeping issues and co-ordination between datasets.

Aim: Identify how significant changes are reported – between networks.

Questions

- Description of network - who, how many, geographic coverage
- Main aims and purpose - the 'why' question
- What does reporting look like and how is feedback provided
- How is change ranked and reported i.e. when something big happens - bird kills, breeding failure etc. Who should this be reported to?
- What else is recorded and who gets the records ... is it clear where other reports should go?
